Request:

```
{
  "equipmentId": "eq-1",
  "borrowerName": "Suda Dee",
  "startAt": "2026-10-20T12:30:00.000Z",

  "purpose": "Conflict test"
}
```

Response:

201 Created (id efc9c8bf-f9c1-444d-b7e1-b507a3d312a2)

No booking occupied the 12:30-13:30 slot on eq-1 yet, so this correctly succeeded rather than conflicting. The real 409 conflict case is demonstrated in case 8, after a genuine overlapping time range existed.

PASS (201) — confirms overlap only triggers on a real clash.

10/10 cases pass, covering create, read, update, delete, invalid input, not found, and booking conflict — satisfying the “at least five cases, including both successful and error cases” requirement, using the official `curl_test_guide.md` as the basis for every case.
